### **KANGURU SOLUTIONS RELEASES SUPER VERSATILE HARD DRIVE DUPLICATOR WITH WORLD'S FASTEST COPY SPEEDS**

Millis, Massachusetts- January 27, 2009- Kanguru Solutions has released the fastest, most versatile hard drive duplicator ever with its' new Kanguru Hard Drive Duplicator SATA.

The Kanguru Hard Drive Duplicator SATA allows IT professionals and novices alike to quickly and easily make copies of virtually any SATA or IDE hard drive. It can also erase drives (to Department of Defense standards), diagnose corrupt or ailing drives, and conduct port tests; essentially making it an all in one hard drive workstation.

Although it's a sophisticated piece of hardware, it's also incredibly easy to use. To begin using basic copy features, just attach a master drive and blank drives, and then press the copy button. It's as simple as that!

With duplication speeds of up to 6GB per minute, the Kanguru Hard Drive Duplicator SATA is the world's fastest hard drive duplicator. It can copy a typical Hard Drive loaded with an Operating System in under 4 minutes. An easy to use LCD and rich feature set make it the perfect combination of performance and versatility!

"The Kanguru Hard Drive Duplicator SATA is an indispensable tool for any IT department." said Kanguru CEO Donald Brown. "It can be used to copy existing hard drives to larger capacities, sanitize old drives containing sensitive data, backup hard drives, and much more. I am extremely proud of this product, its' features and performance! It is simply one of the best products we have ever released!"

The Kanguru Hard Drive Duplicator SATA is Kanguru's second generation Hard Drive Duplicator, replacing the popular IDE model which has been a workhorse in IT departments across the country. The new Kanguru Hard Drive Duplicator SATA not only outperforms its' old counterpart, but also comes with advanced tools and diagnostic features not found in the previous model. Features such as: Drive Wipe, Host Protection Area (HPA) Check, Port Test, Solid State Drive (SSD) Support and more.

Offered in two models, a 4 disk model and a 12 disk model, the Kanguru Hard Drive Duplicator SATA is capable of copying between 4 and 12 hard drives simultaneously. In addition, the Kanguru Hard Drive Duplicator SATA can copy a variety of drives types including: 3.5" SATA, 2.5" SATA, 3.5" IDE, 2.5" IDE. Also, the unit is brand and capacity independent, meaning it will copy to and from virtually any size and brand of hard drive.

A division of Interactive Media Corporation, Kanguru Solutions manufactures high quality, hard drive, DVD and CD Duplication equipment, as well as secure flash drives, external hard drives and more. Interactive Media Corporation was established in Massachusetts in 1992. For more information on Kanguru Solutions, visit their website at [www.kanguru.com](http://www.kanguru.com).
